

## PRESS RELEASE

### Portfolio2 reference tool announced by Milliken Contract

Milliken Contract has announced the launch of Portfolio2, a comprehensive guide to one of the most complete collections of performance and design led commercial carpet available.

Available both in hardcopy and digital formats, Portfolio2 not only catalogues Milliken Contract's modular carpet portfolio, but also charts the manufacturer's progressive policies and sound environmental management that have led to Carbon Negative manufacturing and Carbon Neutral product certification.

Brimming with inspirational photography to help fuel creativity, all modular styles under the Premium Cut Pile Fusion Bonded, High Performance Loop Pile and Essentials Value Tufted Loop Pile collections are included in this latest addition to Milliken Contract's design and specification reference tools.

A weighty 248 pages, Portfolio2 is also packed with eye-catching designs and evidence of Milliken Contract's activities in the office, public, education, healthcare and retail sectors. Readers can also investigate full product specifications and reference installation and maintenance guidelines as well as discover bespoke design services and 5STUDIOMilliken facilities in London and the North of England.

An essential desktop reference for designers and architects alike, Portfolio2 is now readily available as a digital version for the first time:

"We fully appreciate that many designers and specifiers like the tactile quality of hard-copy publications, but we also felt Portfolio2 would serve just as well in an indexed electronic format in both online and offline versions," explains Kate Burnett, Business Development Manager. "We are on-line or near a computer most days and so the flexibility offered by an electronic Portfolio2 seems sensible. Further to this, it also helps to reduce the impact of printing and sending out hard copies."

With Portfolio2 online, Specifiers can click straight to next-day sample services, or same day in London. Furthermore there is a vast array of designs all available on a made to order basis, typically despatched within 10 days of order. For those designers looking to specify modular carpet that combines sustainability, performance and style, Milliken Contract's Portfolio2, in either hard or electronic formats, makes a natural starting reference.
